DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-8 and 15-26**, drawn to fluid material examination, classified in **class 324, subclass 204**.
 - II. **Claims 9-14**, drawn to involving antigen-antibody binding or specific binding protein assay, classified in **class 435, subclass 7.1**.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not required the particulars of the subcombination as claimed for patentability and (2) that the subcombination has utility by itself or in other combination (MPEP § 806.05 (c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any kind of a method of performing a binding assay, reads on **claims 9-14**, drawn to involving antigen-antibody binding or specific binding protein assay, classified in **class 435, subclass 7.1**. The subcombination, of **invention I, claims 1-8 and 15-26**, drawn to fluid material examination classified in **class 324, subclass 204**; **invention I** has separate utility, as a tuned circuit, for detecting the resonant frequency, but not limited to, of magnetic samples. **Invention I** therefore spans a specific art area of endeavor while **invention II** comprises the subcombination of **invention I**.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for **Group II** is not required for **Group I**, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to James Oliff on 6/11/02 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
